

Jay Famiglietti Biography

NASA, Jet Propulsion Laboratory

Climate Change Session, Water Boards

Water Quality Coordinating Committee Meeting, October 2017

Jay Famiglietti is the Senior Water Scientist at the NASA Jet Propulsion Laboratory at the California Institute of Technology. Jay is a former professor of Earth System Science and Civil and Environmental Engineering at the University of California (UC), Irvine, where he founded the UC Center for Hydrologic Modeling. Jay and his research team use satellites and develop computer models to track how freshwater availability is changing around the world. He is a current member of the Los Angeles Regional Water Quality Control Board, and a former member of the Santa Ana Regional Water Quality Control Board.
